EDUCATOR PREPARATION

Teacher has attended ECS professional development program: **Yes**
A school leader has attended a CS professional development: **No**
A district leader has attended a CS professional development: **No**

TEACHER PERSPECTIVES

Quotes from an Exploring CS teacher:

"The overall feeling allows all voices to feel heard, discussions to happen that might not have otherwise had a chance, and new skills to be learned in a fun and engaging lesson!"

"Our school schedule is a unique one of three days on campus and two days at-home, each week. We have had to adjust pieces of the curriculum to fit that, since there are two days a week that the students are independently working at home. For the Problem Solving Unit where we learned just briefly about Computational Thinking, we took it a step further and each student developed both a physical draft of a poster using the Four Pillars of Computational Thinking and then used some of their new Computer Science skills to develop a final poster using Canva. We are printing their posters to hang in the computer lab!"
