EDUCATOR PREPARATION

Teacher has attended ECS professional development program: **Yes**
A school leader has attended a CS professional development: **No**
A district leader has attended a CS professional development: **No**

TEACHER PERSPECTIVES

Quotes from an Exploring CS teacher:

"A highlight: I had to miss one of my ECS classes two weeks ago. The substitute teacher commented that one of my students showed him three times about what he had added to the webpage that he was making. My student was so proud of his work. Exploring Computer Science helps students feel better about who they are and what they can do, even if they don't continue on in the class."
