EDUCATOR PREPARATION

Teacher has attended ECS professional development program: **Yes**
A school leader has attended a CS professional development: **No**
A district leader has attended a CS professional development: **No**

TEACHER PERSPECTIVES

Quotes from an Exploring CS teacher:

"An average day in my ECS classroom appears chaotic and rambunctious. Once materials are distributed they are off and going, talking to their group, engaging in conversation, and asking for clarifications on requirements. Some finish up early and work on their own individual projects such as making refinements to their Scratch game or working on a design."

"Using my maker skills I whipped up some window coverings. I've used this as an example to students on how you can solve problems, make things, and make the most of the situation that you are in."
