### EDUCATOR PREPARATION

Teacher has attended ECS professional development program: **Yes**  
A school leader has attended a CS professional development: **No**  
A district leader has attended a CS professional development: **No**

### TEACHER PERSPECTIVES

Quotes from an Exploring CS teacher:

*"The lesson structure that ECS provides—journal, pair share, discussion, activity with exploration, reflection—is one that I use across my classes as much as possible. It allows students to process individually, then think more in a small group setting before joining the whole class for discussion and exploration. It allows for a variety of experience levels, perspectives, and background to be heard, celebrated, and included."*

*"The classroom is set up to facilitate group learning and also displays student work on the walls. It shows the students we are here to work and learn together and that their thoughts and what they create is valuable."*
