### EDUCATOR PREPARATION

Teacher has attended ECS professional development program: **Yes**  
A school leader has attended a CS professional development: **No**  
A district leader has attended a CS professional development: **No**

### TEACHER PERSPECTIVES

Quote from an Exploring CS teacher:

*"Prior to budget cuts our school offered 17 computer science classes from programming centered to Information Technology skills. Having a wide range of classes brought in students that would not typically choose computer science."*

*"A brand new lab made possible by our district's technology bond. Computers are also set up so all students are able to look towards the front of the room during instruction and allow for student pairing for projects."*
