EDUCATOR PREPARATION

Teacher has attended ECS professional development program: **Yes**
A school leader has attended a CS professional development: **No**
A district leader has attended a CS professional development: **Yes**

TEACHER PERSPECTIVES

Quote from an Exploring CS teacher:

"Following the e-textiles unit, one of my students who had never taken a CS course before decided she wanted to pursue a minor in computer science when she attends college next year. She is taking our dual credit Computer Science Principles course this year. The e-textiles unit provides students with an opportunity to craft something that includes their interests tied in with the concepts of CS."

"This student felt the same passion about this project as I did when I attended the summer PD. They requested to take the project home because they had so many details they wanted to work on."
